PALLASSOS

The Filigranes Company was founded in 2004 by two clowns, but from 1996 onwards, Jordi Torrens (Trinxeta) and Albert Pérez (Makutu) have been together in scene.

The headquarters are located in Terrassa, at the premises of the circus association Tub d'Assaig 7'70, of which they are founders and active members. They also take part in the Clowns Art and Effect Association, and have been part of other groups of clowns, circus and street art: Alternatiu X, Sàtirs, Pallassos Perillassos, S3 De Riure, La Cremallera Teatre, Comediants, Pallassos sense Fronteres and Improvisto's Krusty Show.

They have acted in the Major Festivals of cities, towns and neighborhoods, theaters and festivals, have performed and co-created several circus raffles and accumulate a wide range of workshops and recreational and educational activities.

A child with red face paint is pouring water from a blue bowl into a red water tray. In the background, other children are playing with water toys like water guns and a water gun. The scene is outdoors with trees in the background.

SYNOPSIS

WATER TRICKS WORKSHOP

Few things are as fun as playing with water! With it we will refresh and learn at the same time!

We will enjoy an itinerary with different stations, where children and youngsters will go through while practicing their skills in a funny way.

A photograph of a water play structure made of green wooden frames and white funnels. A child is pouring water from a pink bucket into the top funnel. Other children and adults are visible in the background on a grassy area with a stone wall. The structure has multiple levels with funnels leading to various colored buckets (yellow, orange, red, green, pink) at the bottom.

WHAT WILL WE LEARN?

This so refreshing workshop will give you the option of turning a mill wheel, creating a waterfall, playing with counterbalances, imagining the work that requires water from a well ...

Wooden structures combined with recycled elements will create awareness of the importance of recycling and the use of water for small and large.

A group of five children are gathered around a blue water table outdoors. One boy is pouring water from a clear plastic bottle into the table. The other children are looking on with interest. In the background, there is a yellow building, a silver car, and some trees.

TECHNICAL CARD

WATER TRICKS WORKSHOP

- Seasonal workshop, it is recommended to do it outside, use comfortable clothes and shoes that can get wet.
- A water point is needed next to it (preferably with a hose).
- A point of light is necessary.
- The number of shopkeepers will depend on the volume of participants.
